Professional Summary

Frontend Software Engineer with 3+ years of experience delivering scalable web and cross-platform mobile applications using React.js, React Native, TypeScript, and Next.js. Built production fintech platforms handling multi-gateway payment flows, real-time communication via WebRTC and Socket.io, and enterprise-grade RBAC systems, shipped to Google Play Store and Apple App Store while maintaining 85%+ test coverage and consistently optimizing bundle size and render performance.

Technical Skills

Web: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Material-UI, WCAG Accessibility

Mobile: React Native (CLI & Expo), NativeWind, Gluestack UI, TamagUI, React Native Paper

State Management: Redux Toolkit, RTK Query, Redux-Thunk Middleware, Reselect, Context API

Real-Time & Communication: Socket.io, SockJS, WebRTC, WebSockets, REST APIs

Data Viz & Forms: Chart.js, D3.js, React Hook Form

Testing & API: Jest, React Testing Library (RTL), Axios, Swagger, Postman

Auth & Security: JWT Authentication, Role-Based Access Control (RBAC)

Deployment: Google Play Store, Apple App Store, Vercel, GitHub Pages

Tools: Git, GitHub, GitLab, Bitbucket, Vite, Webpack, ESLint, Prettier, JIRA, Confluence

Professional Experience

EDSOM FINTECH PVT. LTD.

May 2025 – Jul 2026

Software Development Engineer

Pune, Maharashtra

- Engineered iPaesa web and mobile payment platform (React.js, Expo, TypeScript) serving 10K+ daily active users across 5+ payment gateways with wallet transactions, receipt generation, and transaction reports; achieved 99.7% transaction success rate
- Built FINAMSCCS and VLNIDHI corporate banking suite (web + mobile) with 15+ role-based permissions, audit logging, multi-stage KYC approval workflows, and dynamic plan-configuration UI for admin-defined savings/investment plans
- Developed BOLBUDDY, a real-time web and mobile chat application using Socket.io, WebRTC, and SockJS supporting text messaging, voice/video calling, and auto-disappear messages
- Delivered HRMS dashboard with Chart.js/D3.js workforce analytics, virtualized data tables handling 10K+ employee records, and Reselect-optimized selectors sustaining 60 FPS scrolling; cut render time by 35% and JS bundle size by 28%
- Architected a component-based design system with atomic design principles (50+ reusable, documented components), improving development velocity by 40%; implemented RTK Query with normalized Redux state and optimistic updates, cutting API calls by 60%
- Collaborated closely with product designers and cross-functional stakeholders within agile (2-week) sprints, and conducted regular pull request reviews to uphold code quality and consistency across the frontend codebase

MTREE TECH SOLUTIONS

Jun 2023 – Mar 2025

Software Development Engineer I

Nellore, Andhra Pradesh

- Spearheaded migration of 20+ class components to functional components with React Hooks and modernized legacy DXP toolkit to Connect Toolkit, reducing technical debt by 40%
- Architected Redux Toolkit and Context API state management across 3 production projects, cutting redundant API calls by 35% through efficient data normalization and caching
- Established Jest and RTL testing standards maintaining 85%+ code coverage; integrated 8+ REST APIs via Axios achieving a 99.2% success rate in production
- Engineered JWT-secured RBAC systems across 3 applications supporting 5 distinct user roles with protected route navigation
- Mentored a cohort of 5 interns through 1:1 and group sessions – running doubt-clearing sessions, guiding project work, and explaining new technical concepts – while reviewing pull requests for 3 engineers to uphold code quality

MTREE TECH SOLUTIONS

Dec 2022 – May 2023

Software Development Intern

Nellore, Andhra Pradesh

- Developed the company's static marketing website using HTML5, CSS3, and JavaScript, published via GitHub Pages
- Built a medical appointment portal achieving 95% cross-browser compatibility with Bootstrap 5, reducing UI development time by 30% through reusable component patterns
- Modernized a legacy PHP codebase across major version upgrades, resolving 15+ security vulnerabilities and version-compatibility issues while reducing page load times by 47% via lazy loading and asset optimization
- Built a custom content management system giving the client self-service control over gallery images and content, replacing a manual upload-and-redeploy workflow and eliminating update delays
- Delivered across multiple concurrent client projects in a fast-paced startup environment with daily standups, adapting quickly to shifting priorities without formal sprint cycles

Key Projects

iPaisa – Payment & Utility Services (Web & Mobile) | *React.js, Expo, TypeScript, Redux, Multi-Gateway APIs, JWT*

- Built a unified fintech web platform and cross-platform iOS/Android app processing 10K+ daily transactions across recharge, bill payments, travel booking, and money transfer, integrated across multiple gateways (Razorpay, Cashfree, Easebuzz, UPI)
- Implemented granular JWT-protected RBAC across web and mobile, with accessible theme-aware UI (Gluestack UI, NativeWind) supporting dark/light modes and WCAG accessibility standards
- Built a real-time transaction monitoring dashboard with live status updates and automated reconciliation; centralized state across 15+ mobile screens with Redux Toolkit, cutting API call duplication by 40% and improving cold app startup time by 25%

FINAMSCCS & VLNIDHI – Corporate Banking (Web & Mobile) | *React.js, React Native, Redux, React Hook Form, JWT*

- Designed an enterprise banking application with modules for Member Management, Savings, Fixed/Recurring Deposits, Loans, and Investment Plans across web and mobile
- Implemented role-based access control with 15+ user roles, a dynamic permission system, and audit logging for compliance, plus a multi-stage KYC verification workflow with document management
- Built complex form flows with React Hook Form (custom validation, conditional logic, multi-step wizards) and a dynamic plan-configuration system letting admins define custom savings/investment plans with variable interest rates and tenure

BOLBUDDY – Real-Time Chat App (Web & Mobile) | *React, React Native CLI, Redux, Socket.io, WebRTC, SockJS*

- Built a real-time chat application for web and mobile with live text messaging, one-on-one and group voice calling, WebRTC-powered video calling, and privacy-first auto-disappear messages
- Architected the real-time event layer using Socket.io with SockJS fallback for cross-environment compatibility, targeting reliable low-latency message delivery under varying network conditions
- Synchronized chat and call state across web and mobile clients using Redux, maintaining a consistent user experience on both platforms

HR Management System (HRMS) | *React.js, Redux, Reselect, Chart.js, D3.js, Material-UI*

- Delivered an HR dashboard with modules for employee lifecycle management, attendance tracking, leave management, payroll processing, and performance reviews
- Built data-rich workforce analytics dashboards with Chart.js and D3.js, and virtualized, server-side-paginated tables handling 10K+ employee records
- Applied useMemo, useCallback, React.lazy, code splitting, and Reselect selector optimization, sustaining smooth 60 FPS scrolling while improving dashboard render speed by 35% and cutting initial JS bundle size by 28%

MATCH – Merchant Compliance Tool | *React.js, Redux Toolkit, Jest, RTL, Axios (Client Project)*

- Migrated a legacy compliance application from a deprecated toolkit to Connect Toolkit, reducing technical debt and improving long-term maintainability
- Implemented Redux Toolkit with Thunk middleware for 15+ business-critical async operations, processing 500+ daily merchant verification requests with robust error handling
- Authored 150+ unit and integration tests using React Testing Library, achieving 85% code coverage across core compliance features and reducing production bug rate

Education

Sree Venkateswara College of Engineering

B.Tech in Electrical & Electronics Engineering

2020 – 2023

GPA: 7.6

Government Polytechnic Nellore

Diploma in Electrical & Electronics Engineering

2017 – 2020

GPA: 8.8

Certifications & Achievements

Standout Performer Award 2023 – Mtree Tech Solutions

Postman API Fundamentals Student Expert – Postman

[Verify Certificate](#)

Git & GitHub Certification – Simplilearn
